

Cleaning The Air That We Breathe

Together, we are making a difference

Air quality in Southern California has improved dramatically, however, we still have a long way to go to meet state and federal air quality health standards. We offer the following suggestions on how you can join the South Coast Air Quality Management District in “Cleaning the Air That We Breathe.” Together, we are making a difference.

When buying your next vehicle, consider choosing one of the lowest-polluting models available.

For more information, go to www.cleanairchoices.org. Also, schedule regular vehicle maintenance checks. Consider carpooling to work one day a week or more, and avoid those “jack rabbit” starts, use cruise control to maintain a steady speed.

Help cut pollution by replacing your gasoline-powered mower with an electric model, and use an energy efficient natural gas Bar B Q grill. Also, try a non-toxic alternative to dry cleaning such as professional wet cleaning, and read those paint labels – choose coatings that contain little or no smog-forming pollutants, identified as volatile organic compounds or VOC's.
